Education

Washington and Lee University
2015 - 2019
Bachelor of Arts, Computer Science

Proficiencies

JavaScript	Node
React	Git
React Native	Express
NextJS	AWS SAM

Working Knowledge

PostgreSQL	AWS ECS
Docker	Spring
Dart/Flutter	GraphQL
Appium	Python
Lighthouse	

I'm a software engineer experienced with working on all parts of the tech stack. I've worked on enterprise-level React web apps, React Native cross-platform apps, REST APIs, and more.

Experience

Nxu   *May 2023 - May 2024*
Senior Software Engineer
React | React Native | Expo | NextJS | AWS Lambda | PostgreSQL
Nxu is an electric vehicle charging station manufacturing startup based in Tempe, AZ. It created several prototype charging stations connected via the Internet of Things (IoT).

My role at Nxu was multifaceted. I primarily worked on the inward-facing admin panel used to facilitate a multitude of operations with the charging stations. This included CRUD operations on the stations, sending commands to the stations, displaying relevant testing metrics, and much more.

In order to meet company goals, I also contributed heavily to the outward-facing React Native application. This app allowed customers to begin and end charging sessions at the station, manage their profile, and update their billing preferences.

Publicis Sapient   *June 2018 - May 2023*
Software Engineer
Publicis Sapient is an international digital business transformation consulting company. This afforded me the unique experience of working with several clients, often in different industries.

CLIENT: Mayo Clinic
React | React Native | NextJS | GraphQL | Node | Android Studio
I worked as part of a small team to create a prototype cross-platform survey app for upper-digestive surgery outpatients. We also renovated Mayo's primary website and mobile app on an ambitious timeline. I was one of the few team members to split time between both the React website and React Native mobile app.

CLIENT: Marriott
Spring Boot | React | Java | NodeJS | GraphQL | REST APIs
I built microservices for handling vacation rental data for Marriott's Homes and Villas (HVMI) program. I later transitioned to the frontend and created components and webpages for the HVMI website.
